

THE BOUDICA PACT

Case File for Neon Relic — a complete 9-piece document package for 2-3 sessions.

DA Summary: A Tier 2 binding — sustained by a single gold coin buried in a Staffordshire field since the 7th century — has been breached by a farmer who ploughed up the keystone and then vanished. After Boudica's defeat in 61 CE, her dying rage was adopted by something older — a pre-Celtic presence in the earth — and became a creeping blight. The Romans couldn't destroy it. They bargained with it: gold in the earth, the curse sleeps. The Anglo-Saxons reinforced the binding. Now the coin is gone, the farmer is missing, and the binding is failing. The agents must trace the pact from a Mercian monk's chronicle in London to a Roman ledger in the Vatican to a museum vault in Birmingham before the entity the coin was holding back finishes waking up.

PACING

Single session: Start at Day 4. Advance aggressively — 2-3 org squares per shift. Focus on Staffordshire, the chronicle, and the museum infiltration. Skip Rome or handle it via HQ fallback.

Multi-session (2-3): Start at Day 7. Session 1: Staffordshire and London (the farm, the pub, Eadwine's chronicle). Session 2: Rome (the Vatican archive, the ledger). Session 3: Birmingham and Staffordshire (the museum vault, the re-burial).

Built using the Neon Relic Case File system. All rules references: Chapters 11 (Artifacts), 14 (DA Guidance), 15 (Case Files).
