SECTION VII — AGENT BIOGRAPHY

BEFORE THE COVENANT — WHO WERE YOU?

Born in a Cossack settlement near Rostov-on-Don. Grandfather taught him the old ways — horsemanship, saber craft, the Cossack code of honor. Dmitri was never built for the saddle. Nearsighted, small, and more interested in disassembling radios than riding. Found his place in Soviet technical institutes. By 30, designing signal-processing equipment at a closed military facility outside Novosibirsk — with basic firearms training required by his security clearance. The Covenant found him through a 1979 incident: a recovered artifact broadcast on military frequencies. Dmitri was the only engineer who could isolate the signal. Eight years in Stack. Recovery agents visit his workshop when standard gear won’t cut it.
